

Groundbreaking Scheduled for Avera Marshall's Medical Office Building

Avera Marshall will hold official groundbreaking for a new medical office building expansion on Thursday, August 11 at 8:30 a.m. with construction to begin immediately after. The public is invited to attend.

The new facility will consist of a 22,500 square-foot addition adjacent to the hospital's existing clinic, with 40 additional exam rooms, imaging services and lab space.

The project is a natural outgrowth of the hospital's successful physician recruitment efforts.

The new medical office building will be a one-story construction, extending from the hospital's existing clinic toward Bruce Street, with access on the lower level. The new space has been designed for efficiency and easy access with an emphasis on the patient experience. The general contractor for the project will be Sussner Construction of Marshall. BWBR Architects are the designers of the building. Construction is expected to be completed by December, 2012.
